# About Company

Founded in 1994, Dhanuka Fittings has grown into one of India's **leading manufacturers of aluminum door and window hardware.** From a modest beginning in trading, we have evolved into a powerhouse of in-house manufacturing, research, and innovation.

Operating from a 30,000 sq. ft. state-of-the-art manufacturing facility with a team of 75+ specialists, we design, engineer, and manufacture over 90% of our product range under one roof. From raw material processing to anodizing and powder coating, every stage is controlled with precision to ensure un compromised quality.

Our portfolio covers the **complete hardware ecosystem for aluminum windows and doors**-Hinges, Rollers, Locks, Handles, Louvers, Cleats, Friction Hinges, Plastic Hardware, EPDM, Woolpile, and more. With continuous investment in research and development, we not only refine existing products but also design and introduce new components that set benchmarks in performance and reliability.

Every product undergoes **rigorous testing** and every product is backed by our **10-year guarantee,** reinforcing our commitment to durability and trust. By combining advanced manufacturing with global sourcing, we deliver a one-stop solution where customers find everything they need from a single, dependable partner.

At Dhanuka Fittings, we don't just supply hardware—we build confidence, innovation, and long-lasting partnerships.

**Partner with us, and let's build safer, stronger, and better façades together.**
